

NUCLEAR DENSITY METER - USERS COURSE

A HALF DAY IN-HOUSE COURSE WITH A PRACTICAL COMPONENT FOCUSING ON...

- What an NDM is
- How it works
- What an NDM actually measures
- How we interpret the results
- The implications of poor NDM use
- How we store it
- How we transport it
- How we look after it
- Calibration and record keeping

At the end of this course candidates will have a full understanding of NDM's and be able to interpret the results to the advantage of the contractor.

Candidates will also be proficient in the storage and transportation of NDM's.

Detailed course content and pricing is available on request
